Assignment # 8

Design a pseudo code and Flowchart to solve the following Problem

Rank (Arrays)

Design a program that asks the user to enter a student's mark of Problem Solving and Program Logic. The number of students is 10 and the range of mark is 0 to 100. Display the mark and the rank. The marks should be stored in an array. Use loop to input, store and display the result. Use a function to get rank. Ex) getRank(marks, mark)

Guideline:

Use and Array to solve the above problem

Add comments with your name/student number

Don't add this assignment description

Give a proper indentation

Give a reasonable variable and function name

The logic should be worked perfectly

Do not copy directly from any web site or from another student.
