Assignment # 7

Design a pseudo code and Flowchart to solve the following Problem

Late Assignments will not be accepted or marked!

1. **Payroll Program with Input Validation** (Chapter 7- Input Validation)

Design a payroll program that prompts the user to enter an employee's hourly pay rate and the number of hours worked. Validate the user's input so that only pay rates in the range of $7.50 through $18.25 and hours in the range of 0 through 40 are accepted. The program should display the employee's gross pay.

Note:

Follow the variable naming conventions (i.e. <u>use camel case notation</u>, use meaningful names)

Use IsInvalid() Or IsValid() function to do this. It should return Boolean Value

Include comments

Proper indentation is necessary

Do not copy directly from any web site or from another student.
